School Fee Management System

Existing Fee Software Replacement

Prepared For: Afroz Sir

Schools: UME English School & Mount Mary Mission School

PROJECT INVESTMENT

₹30,000

₹15,000 per school

Digital Marketing • Web Development • ERP • Business Automation

1. Project ka Maqsad

Is project ka maqsad dono schools mein currently use ho rahe existing fee software ko replace karna hai.

Naya system simple, fast aur easy-to-use hoga jisme Fee/Accounts staff: Student Search → Fee Dekhe → Payment Receive Kare → Receipt Nikale ye poora kaam ek hi system se kar sakega.

Dono schools ka fee data alag rahega, lekin system ka core ek hi rahega.

2. Fee Setup

Har school ke liye alag fee structure configure kiya jayega.

Academic Year, Class, Section, Fee Heads, Fee Amount, Installments aur Due Dates manage kiye ja sakenge.

Fee heads aur amounts permanently hardcode nahi honge.

Example fee heads: Education Fee, Admission Fee, Computer Fee, Exam Fee, Activity Fee, Breakfast Fee, Term Fee aur Other Fee.

3. Student Fee Account

Har student ka complete current fee status ek jagah dikhega:

- Student Name
- GR Number
- Class / Section
- Total Fee
- Paid Amount
- Previous Due
- Current Due
- Concession
- Fine
- Final Outstanding

4. Fee Collection

Fee receive karte waqt staff student search karega, outstanding dekhega, payment amount enter karega, payment mode select karega aur payment save karega.

Payment modes: Cash, Online / UPI, Bank aur Cheque.

5. Fee Receipt

Payment ke baad professional receipt automatically generate hogi.

Receipt mein School Logo, Receipt Number, Date, Student Name, GR Number, Class / Section, Fee Details, Previous Due, Concession, Fine, Paid Amount, Payment Mode aur Remaining Balance show hoga.

Receipt Options: Print, PDF aur Reprint.

6. Installment System

School apni requirement ke hisaab se installments configure kar sakega — jaise Monthly, Quarterly ya Term-wise.

Har installment ka Amount, Due Date aur Applicable Fee set kiya ja sakega.

7. Previous Due & Outstanding

System automatically student ka outstanding calculate karega:

Previous Due + Current Fee + Fine – Concession – Paid Amount = Outstanding

Isse accountant ko manually calculation karne ki zaroorat kam hogi.

8. Concession / Fee Mafi

Student ko di gayi fee concession/mafi system mein record ki ja sakegi.

Student, Concession Amount, Reason/Remark aur Date maintain hoga.

9. Fine

Late payment ke liye fine add karne ka option rahega. Fine receipt mein clearly show hoga.

10. Refund

Fee refund ki zaroorat hone par Student, Amount, Reason aur Date record kiye ja sakenge.

Original payment history preserve rahegi. Confirmed receipt ko simply delete nahi kiya jayega.

11. Fee Reports

Ek simple aur powerful Fee Reports section hoga. Filters ke through Date-wise, Class/Section-wise, Student-wise, Payment-mode-wise, User-wise, Outstanding, Daily Collection, Admission Fee, Concession aur Fine reports nikali ja sakengi.

Reports ko Excel/PDF mein export karne ka option rakha ja sakta hai jahan useful ho.

12. Fee Register

Class/section ke hisaab se simple Fee Register: Student, Total Fee, Paid, Concession, Fine aur Balance.

13. Student Fee Card

Student ka fee history ek clean Fee Card mein dikhega: Fee Structure, Installments, Payments, Receipt Numbers, Concession, Fine aur Outstanding.

Isko print/PDF kiya ja sakega.

14. Dashboard

Fee staff/admin ke liye simple dashboard mein Aaj ki Collection, Cash, Online, Cheque, Bank, Total Collection, Total Outstanding, Total Concession aur Total Students ka overview hoga.

15. Data Migration

Existing fee software se available data ko new system mein migrate kiya jayega. Priority: Student Details, GR Number, Current Fee Structure, Current Outstanding, Existing Fee Balance aur relevant payment history.

Existing Software Outstanding → New System Opening Balance ko verify kiya jayega.

16. Dono Schools ka Separate Data

Ek shared system ke andar UME aur MMMS ka data logically separate rahega.

UME ke students, fee structure, payments, receipts, outstanding aur reports alag rahenge; MMMS ka data bhi alag rahega.

Ek school ka fee data dusre school mein nahi dikhega.

17. Existing Software Replacement

Implementation ke baad existing data liya jayega, new system mein setup hoga, balances verify honge, fee collection/receipt/reports test honge aur verification ke baad old fee software ko band kiya ja sakega.

18. Is Phase Mein Kya Nahi Rakha Jayega

₹30,000 ke focused implementation mein unnecessary complexity avoid ki jayegi.

Full Tally-level accounting, complex bank reconciliation, full payroll, inventory, library, transport, advanced CRM, complex payment gateway architecture, native mobile app aur advanced automation is phase mein include nahi hain.

Ye features future complete ERP mein requirement ke according add kiye ja sakte hain.

19. Development Timeline

Target: 7-10 Working Days

Day 1-2: Fee structure + student fee system

Day 3-4: Collection + receipt

Day 5: Concession + fine + outstanding

Day 6: Reports + dashboard

Day 7: UME/MMMS configuration

Day 8: Data migration

Day 9: Testing

Day 10: Final corrections + deployment

Timeline school se required data/access timely milne par depend karegi.

20. Project Investment

School	Investment
UME English School	₹15,000
Mount Mary Mission School	₹15,000
Total	₹30,000

Is amount mein dono schools ke liye shared fee system, individual configuration, required data setup, testing aur deployment included hai.

21. Payment Schedule

₹15,000 — Project Start

₹10,000 — Working System / Testing

₹5,000 — Final Migration & Go-Live

22. Final Result

Project complete hone ke baad dono schools ke paas ek simple aur practical fee management system hoga jisme Fee Setup → Student Due → Collection → Receipt → Outstanding → Reports ka complete basic workflow ek hi jagah manage ho sakega.

Primary objective: Existing fee software ko replace karna aur Fee/Accounts team ka daily kaam simple banana.
